

### **AID-IT Computer Science Hardware Internship – Aurora – Spring or Summer 2021**

The Association for Individual Development has an internship opportunity inside of our IT Department. The applicant should have basic familiarity or experience with computer hardware, and training will be provided. The duties would include disassembling computers and installing memory, among other general IT experiences.

This internship is located out of our Aurora office, and would take place during weekdays. AID will accept either for credit or experiential internship applicants.

Currently accepting applications for spring or summer semesters 2021. Interested interns should complete an application on the AID website:
