

## **Telehealth Made Easy for Higher Ed**

**The Virtual Care Group** provides telehealth well-being solutions: counseling, crisis counseling, life coaching and urgent care. Our services are offered 24/7 by master's-level therapists and U.S. board-certified doctors.

Equity and easy access is at the core of our business model: there is no cost to students, no copay, no social security number needed and **NO LIMITS** on the number of sessions! We have a diverse pool of practitioners with an extensive list of specialty areas and among whom 200+ languages are spoken (including American Sign Language).

We are customizable and affordable; campuses can choose to cover a whole campus of students or subsets within the population (ex. residential, online students, graduate students, etc.). Serving as a campus partner for well-being services, we complement existing on campus services or for campuses without services, and we can serve as a virtual health center.

To take advantage of the special **ACI volume pricing discounts**, contact:
