

Supporting Critical Student Well-Being Needs Virtually *Join a Jan. 26 webinar to learn more about telehealth*

Jan. 9, 2023

Telehealth Made Easy for Higher Ed

Almost 50 percent of 2022-entering college students report being "emotionally/mentally" exhausted (BCSSE, 2022) as they were beginning college. With the increase in student need running head first into exhausted front-line caregiver staff,

sustainable solutions are complicated.

The Virtual Care Group will host a webinar Jan. 26, to showcase the benefits of using a telehealth partner to meet well-being needs including:

- **Unlimited services:** Counseling, crisis counseling, life coaching and urgent care services are offered 24/7 by our master's-level therapists and U.S. board-certified doctors, with no caps on sessions!
- **Access and equity:** We remove common student barriers to well-being services as there is no insurance needed, no credit card, no copay, no social security number needed and over 200+ languages are spoken by practitioners, including American Sign Language.
- **Cost savings:** We will review the affordable, customizable cost-savings program offered exclusively to ACI campuses.

Hosted by ACI telehealth solution partner: [The Virtual Care Group](#)

Jan. 26, 2023, 1 p.m. Central Time (U.S. and Canada)
